

cat. no. 216.31

Bottom cabinets

ADDITIONAL COVERING

- Completes the range of furniture.
- It allows defining the additional covering to the suspended ceiling and other places where it is required.
- Allows fitting the HVAC grill or the service door.
- When defining the additional covering, e.g. to the suspended ceiling, from 3 sides, each side should be defined separately. This is the main reason to indicate position and basic layout for each side.

MORE INFORMATION, PHOTOS

TECHNICAL DATA

Material design

thickness

16 mm

0.800000012 mm

0.800000012 mm

Material

Pressed chipboard

Stainless steel sheet AISI 304, polished surface SB

Steel sheet treated with thermosetting powder coat

Width

The requested width to be indicated in millimetres

Height

The requested height to be indicated in millimetres

Installation opening

Opening for service door 600x400 mm

Opening for HVAC grill 600x400 mm

Additional covering without the installation hole

Atypical - You can define the dimensions of the installation hole

The installation hole is defined by the Q sign and by defining the width x height of the opening in millimetres. E.g. Q350x600

Colour finish

White colour. Laminate, basic white, metal RAL 9016

Colour, stainless steel brushed surface SB

Option of defining the laminate colour or RAL colour of the surface

When defining other colour than the selected one, enter Q and subsequently specify the colour of your choice
