

Forclean - Suspended ceilings

SMOKE EXHAUST CEILING PANEL

A smoke exhaust panel for walkable suspended ceiling. The panel is designed as a gravitational system for the exhaust of heat and smoke in the case of an emergency - fire. Suitable for operating rooms, preparation rooms, clean laboratories and clean warehouses. The panel is integrated in a walkable suspended ceiling panel of 1170x1170 mm. The panel is used as a safety device.

It is intended for the ventilation of rooms in connection with an air supply door.
