HVAC attachments and grilles

AIR CONDITIONING GRILLES WITH POCKET FILTERS

Air conditioning grilles with pocket filters are used to exhaust air from rooms or from locations with dust generation. They prevent the transmission of pollutants and dust particles to the exhaust system. When exhausting air to air ducts from clean partitions, it is sufficient to fit the opening in the partition with a frame featuring a grille and a pocket filter.

Product type

HVAC grille with pocket filter

Filter dimensions and depth

filter dimensions 287x287x360

filter dimensions 287x287x590

filter dimensions 287x592x360

filter dimensions 287x592x590

filter dimensions 592x592x360

filter dimensions 592x592x590

Pre-filter frame

frame of filter Al

plastic

Pre-filter filtration class

filtration class G3

filtration class G4

filtration class F7

filtration class F9

Number of filter pockets

number of pockets 2

number of pockets 4

number of pockets 8

Exhaust adapter

exhaust adapter as optional accessory

standard without exhaust adapter

Neck diameter of exhaust adapter

standard without exhaust adapter

diameter of exhaust neck of adapter 160 mm

diameter of exhaust neck of adapter 200 mm

diameter of exhaust neck of adapter 250 mm

Surface of grille parts

stainless steel AISI 304

thermosetting powder coat Komaxit, hue RAL 9002

thermosetting powder coat Komaxit, hue RAL 9016

thermosetting powder coat Komaxit, hue RAL
