

MOVABLE BOX

The movable box is a corpus for mobile device equipped with circulating units, which is used (together with flexible screens, which increase the protection of the product) to set up a closed workplace with uniform airflow, lighting and the required class of cleanliness.

The movable box is delivered with a movable power supply to be connected to a single phase socket 230V/50Hz. The power supply cable to the device is 6 ÷ 8 m long, as required by the customer.
