STAINLESS STEEL AND PLASTIC GUIDE RAILS

Stainless steel guide rails and corner guards are used to protect partitions from damage caused by carts, mobile boilers etc.

Stainless steel handrails - standard interior handrails - long lifetime and easy maintenance due to the materials used.

During production, maximum emphasis is put on precision, quality of welds and final surface finish.

STAINLESS STEEL AND PLASTIC GUIDE RAILS

S1: Type

111.03: Stainless steel and plastic guide rails

S2: Guide rail type

NR: stainless steel guide rails corner piece

NS: straight stainless steel guide rails

NZ: straight stainless steel staircase handrails

S3: Diameter D

40: stainless steel guide rails

60: stainless steel guide rails

S4: Height H

100: Stainless steel staircase handrails

150: Stainless steel guide rails

200: Stainless steel guide rails

250: Stainless steel guide rails

300: Stainless steel guide rails

80: Stainless steel staircase handrails

90: Stainless steel staircase handrails

Height is measured from the floor. For stainless steel staircase handrails: H.80 – D.80, H.90 – D.90, H.100 – D.100.

S5: Depth D

100: stainless steel staircase handrails

80: stainless steel staircase handrails

90: stainless steel staircase handrails

Depth is measured from the partition.

S6: Length L

Recommended length L is in the range from 300 to 3000 mm, in increments of 10 mm.

S7: Material

N4FL : stainless steel AISI 304 GLOSSY

N4F8 : stainless steel AISI 304 FIN 8

*N6FL : stainless steel AISI 316L GLOSSY

*N6F8 : stainless steel AISI 316L FIN 8
