Personnel Airlocks

STAINLESS STEEL AND PLASTIC GRAB RAILS

Stainless steel guide rails and corner guards are used to protect partitions from damage caused by carts, mobile boilers etc.

Stainless steel handrails - standard interior handrails - long lifetime and easy maintenance due to the materials used.

During production, maximum emphasis is put on precision, quality of welds and final surface finish.

TECHNICAL DATA

| Depth is measured from the partition. | |

Length L

Recommended length L is in the range from 300 to 3000 mm, in increments of 10 mm.

Material

stainless steel AISI 316L FIN 8

stainless steel AISI 316L GLOSSY

stainless steel AISI 304 FIN 8

stainless steel AISI 304 GLOSSY

Atypical design

Type design

Atypical design

Type design 0 - Unique specification out of offered versions

Atypical design

Q - atypical design that cannot be uniquely specified by a code
