

AIR CONDITIONING GRILLES WITH POCKET FILTERS

Air conditioning grilles with pocket filters are used to exhaust air from rooms or from locations with dust generation. They prevent the transmission of pollutants and dust particles to the exhaust system. When exhausting air to air ducts from clean partitions, it is sufficient to fit the opening in the partition with a frame featuring a grille and a pocket filter.

TECHNICAL DATA

Product type

HVAC grille with pocket filter

Nominal dimension of grille

filter dimensions 287x287 mm

filter dimensions 287x592 mm

filter dimensions 592x592 mm

Neck diameter of exhaust adapter

diameter of exhaust neck of adapter 200 mm

diameter of exhaust neck of adapter 250 mm

diameter of exhaust neck of adapter 315 mm

without exhaust adapter

Surface of grille parts

stainless steel AISI 304

thermosetting powder coat Komaxit, hue RAL 9016

thermosetting powder coat Komaxit, hue RAL

Atypical design
